DESCRIPTORS: *Astronomy, *Stars, Catalogs

The PFCFS with regard to incidental errors appears to be the most accurate current catalog of faint stars. It is apparently the only catalog in which the average errors of the coordinates of faint stars do not exceed ±0"15 for the 1960.0 epoch. The system of coordinates and of proper motions of the PFCFS is close to the FK3 with the exception of the system of right ascensions of
